

# SOYABEAN

## Crop Information Sheet

**SUREWAY**

SOYBEANS		LAND PREP	PLANTING	VEGETATIVE	FLOWERING	POD SET
Product	Description					
MicroCal	Soil pH is crucial for nutrient availability	As per soil pH				
MicroDol						
MicroGyp	Calcium is important for aeration of soils and nutrient uptake. Calcium is important for Nodulation to occur	Soil Amelioration	Apply 50-60kg/ha in furrow			
GenieBoost	Humic acid assists in nutrient retention and stover breakdown.	Stover breakdown - applied at 10L/ha, with irrigation and incorporated into the soil	Before Fertilization - 10L/ha, applied with pre-irrigation			
NitroLiq	Premium liquid Rhizobium bacterial inoculant		Coating - Apply 300ml/100kg seed			
TriCure	Prevention of Rhizoctonia and Fusarium		Coating - Apply 100g/100kg seed			
Vitazyme	Stimulates multiple enzyme reactions, improving photosynthesis and other plant processes				Foliar - Apply at 1L/ha	
EcoKsil	Fortify plants cells and surfaces against pathogens, and increase chlorophyll concentration in the leaf.			Foliar - Apply a 1-2L/ha
